Summary

Data / Business Analyst with experience delivering cross-functional analytics solutions across e-commerce, healthcare, HR, and finance domains. Skilled in Tableau dashboard development and KNIME workflows to consolidate data from multiple sources into a single, unified view. Proven ability to design interactive, insight-driven dashboards that enable leadership to make informed financial, operational, and strategic decisions.

Skills

- **Languages:** HTML, CSS, SQL, Java & Python (Basics).
- **Databases:** MSSQL, MYSQL, Oracle SQL, SSMS
- **IDEs & Tools:** Google Looker Studio, Power BI, Tableau, Knime Analytics, SSMS, VS Code, Excel (Power Query, Pivot Tables).

Experience

Data / Business Analyst
May 2025 to Current
Indi Village Technology–Raichur, India

1. E-Commerce Product Analytics: Designed and developed SQL, KNIME, Tableau, and Looker Studio workflows to track client task uploads, completion rates, SLAs, accuracy, and average time per task (ATT). Built interactive dashboards to visualize daily task volume, user performance, task accuracy, SLA adherence, and operational KPIs, enabling clients to monitor productivity, optimize workflows, and improve task efficiency.
2. HR / MIS Analytics: Developed headcount and attrition dashboards in Tableau with drill-downs by department, location, role, and tenure. Delivered insights to identify workforce gaps, attrition patterns, and resource allocation needs, supporting HR and leadership decision-making.
3. Finance Analytics: Consolidated financial data from multiple sources into a single unified view. Created Tableau dashboards for revenue, cost, and performance monitoring, enabling leadership to make informed financial and operational decisions.
4. Healthcare Client Analytics: Analysed 300+ dental clinics covering revenue, patient visits, and operational metrics. Built dashboards to identify clinics that should increase marketing spend or improve operational readiness, providing actionable insights for strategic decisions.
5. Cross-Functional Data Workflows: Automated ETL and data preparation processes using KNIME to ensure clean, accurate, and ready-to-use datasets for reporting and analysis.

Data Processing Analyst

March 2023 to May 2025
Indi Village Technology–Raichur, India

1. Managed multiple operational projects on the Tatva platform for e-commerce clients, tracking task uploads, completed tasks, SLA adherence, expected vs. actual accuracy, and average time per task (ATT)**.**
2. Conducted data auditing, reconciliation, and validation **to** ensure high data accuracy and reliable reporting**.**
3. Collaborated with cross-functional teams to implement workflow improvements and monitor operational progress.
4. Analyzed and organized complex data for precise and compelling product listings.
5. Employed exacting data filtration methods to extract relevant insights for adherence to client guidelines (US, Australian, Canadian).

Trainee Java Full-Stack Developer

August 2022 to February 2023
Jspiders–Bengaluru, India

1. Actively participated in coding and debugging applications as a Trainee Full-stack Java developer Engineered user-centric UI features using HTML, CSS, JavaScript for an enriched interface.
2. Developed robust REST APIs and back-end functionality employing Java and Spring framework.
3. Designed and executed database schemas, proficiently managing CRUD operations via SQL and Hibernate.
